

How to generate an error log for reporting:

First step is to go to your VPN LIST tab.

Then **click the edit tab and enable developer console**:

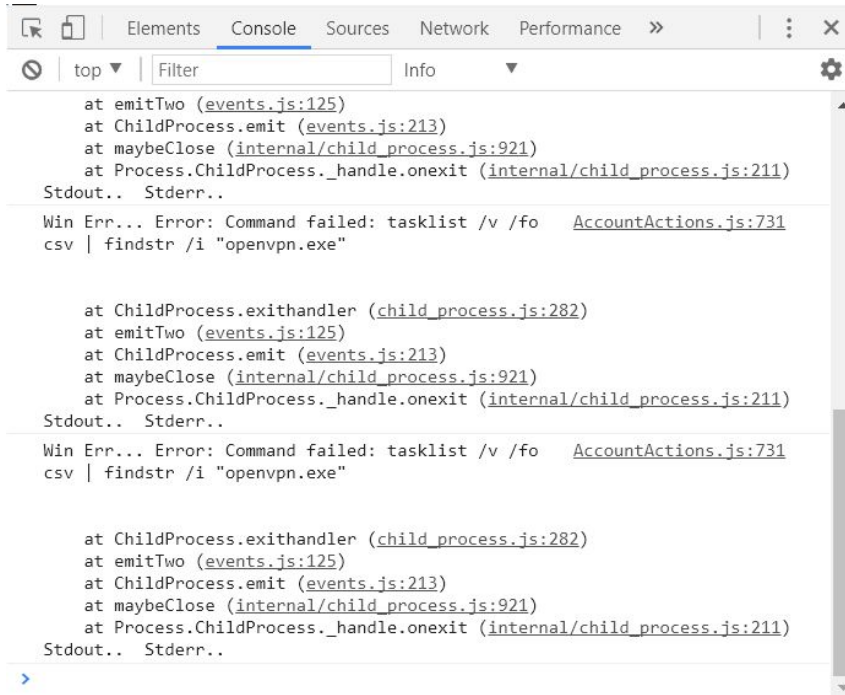

Then once you have enabled it, your screen will look like this

Click on the CONSOLE button where the red arrow is

Then click to **Connect To a Server** and **post what is in the white box**, you will be able to highlight it and copy paste it CTRL + C, CTRL + V

And example looks like this

```
at emitTwo (events.js:125)
at ChildProcess.emit (events.js:213)
at maybeClose (internal/child_process.js:921)
at Process.ChildProcess._handle.onexit (internal/child_process.js:211)
Stdout.. Stderr..
Win Err... Error: Command failed: tasklist /v /fo AccountActions.js:731
csv | findstr /i "openvpn.exe"

at ChildProcess.exithandler (child_process.js:282)
at emitTwo (events.js:125)
at ChildProcess.emit (events.js:213)
at maybeClose (internal/child_process.js:921)
at Process.ChildProcess._handle.onexit (internal/child_process.js:211)
Stdout.. Stderr..
